Special customized version foxFlash Manager 1.3.6 version

The foxFlash team is proud to announce the 1.3.6 management software update, through which we will

1: Improve all VR databases.

2: Personal equipment customization.

3: Customize your brand tuning logo into the tool software(order from seller via the plugin in foxFlash Manager button).

4: Special personal beta version customization and testing.

5: Private tool VR database, exclusive VR model database.

6:Special personal VR data needs to be opened on the official website and contact us through the online chat tool to assist you in updating the individual VR file database.

Update method: Open foxFlash Manager software and it will automatically push the update. During this period, keep the USB connection of the device until the download is completed and reinstalled, you will see a new function.
